| 40 | 2-ethylhexyl acrylate                                                    | 103-11-7         | Xi; R37/38<br>R43                                                                         | 2-Ethylhexyl acrylate is used as a monomer in the chemical industry for the production of polymers and copolymers, which are mainly processed further to aqueous polymer dispersions. The polymers and polymer dispersions are used in adhesives and as binders for paints. Other applications include coatings raw materials and uses in the plastics and textiles industries. |                                                                    |
